

Upper Valley Recycling

Harvest Compost

Harvest Compost is made from grape seeds, skins and stems. This material, called grape pomace, is composted using an aerated static pile. This product is organic and listed with OMRI, Organic Materials Research Institute.

Price per ton FOB	\$26
*Price per ton delivered 3 to 10 ton minimum	\$28
Price per yard FOB	\$20 per yard

Blended Compost

2/3 of this blended material is collected from our residential clean green cart program. The material is ground and screened to 3/8 inch. This clean green material is then blended with Harvest Compost.
